Supplement to Commodity Code  
Revised October 25, 1943

The "Commodity Code, Revised October 25, 1943", is designed to permit use in a loose-leaf binder. The loose-leaf feature makes it possible to keep the code current at all times. Revised sheets will be issued periodically to cover changes under codes already established or listings of new codes or classes.

The revision date will appear on the lower right hand corner of each new page or supplement to a page.

Attached is the list of new pages to be inserted in each section. Check to see that all pages listed are received; remove old pages bearing the same number; and insert the new pages immediately.
